PROFESSIONAL SUMMARY

Software engineer with 1.5+ years of experience in enterprise web development and applied AI systems. Proficient in React, Spring Boot, Node.js, and vector-database-backed search. Currently at TCS building a production Tax Management System and participating in Agile ceremonies.

EXPERIENCE

Assistant System Engineer | **Tata Consultancy Services (TCS)** - Ahmedabad, India Nov 2024 – Present

- Coordinated Agile/Scrum ceremonies as Scrum Master during training, leading a 5-member team to deliver a Bill Management System across 4 sprints with zero critical defects
- Implemented 5+ Angular frontend modules for a Tax Management System — form validation, Role-Based Access Control (RBAC), and REST API integration with Spring Boot — reducing data-entry errors by 30%
- Contributed 3 Spring Boot service endpoints for tax calculation and report generation, cutting manual reporting effort by 2 hours per week

Junior Full Stack Developer | **Learniphi Technology Pvt. Ltd.** - Ahmedabad, India Jul 2024 – Oct 2024

- Engineered an offline document viewer plugin for Open edX LMS supporting PDF, PPT, Word, and Excel — deployed across 5+ courses serving 200+ learners
- Integrated Razorpay payment gateway and Google OAuth2, streamlining checkout for 200+ users and reducing failed authentication attempts by ~40%
- Built an admin panel for PANIIT managing 500+ user accounts, cutting admin response time from 2 days to under 4 hours

Software Developer Intern | **Learniphi Technology Pvt. Ltd.** - Ahmedabad, India Jan 2024 – Jul 2024

- Collaborated with senior engineers on 3 live projects, shipping React components and REST API integrations within the first month
- Boosted frontend rendering performance by refactoring React state management, reducing unnecessary re-renders by an estimated 35%

SKILLS

Languages: JavaScript, TypeScript, Python, Java, C, C++, HTML, CSS
Frontend: React.js, Next.js, Tailwind CSS, Recoil
Backend: Node.js, Express.js, Spring Boot, RESTful APIs
Databases: MongoDB, Supabase, Prisma, Pinecone (Vector DB), PostgreSQL
DevOps & Tools: Docker, GitHub Actions (CI/CD), Kafka, Git
Concepts: Agile/Scrum, Semantic Search, OAuth2, Microservices, Open edX

PROJECTS

CereBro — Intelligent Second Brain · *React, TypeScript, Node.js, MongoDB, Pinecone, Groq (Llama 3), Tailwind CSS*

- Architected a Retrieval-Augmented Generation (RAG) search pipeline using Groq (Llama 3) and Pinecone Vector DB, enabling semantic queries and natural language conversations across a personal knowledge base
- Integrated the Xenova Transformers API for in-browser vector embeddings, enabling semantic search without server-side inference
- Built an automated URL scraping engine with Cheerio for rich metadata extraction, and secured auth via Google OAuth2 with Recoil for state management

NewsExpress — Personalized News Intelligence · *React.js, Supabase, Pinecone, GitHub Actions, EmailJS*

- Launched a news search engine using the NewsData.io API and Pinecone Vector DB, supporting natural language queries across 1,000+ indexed articles with under 150ms response time
- Automated daily news aggregation and personalized email digests using GitHub Actions and EmailJS — 100% serverless, serving 50+ subscribers
- Delivered a subscriber management interface with React.js and Supabase covering sign-up, preferences, and real-time feed updates

EDUCATION

B.Tech in Information Technology

2020 – 2024

Government Engineering College, Gandhinagar, Gujarat

CGPA: 8.21 / 10

Coursework: Data Structures & Algorithms, Database Management Systems (DBMS), Operating Systems, Object-Oriented Programming (OOP), Computer Networks, Software Engineering
